

requires half the connections of an onsite construction joint and also have the reassurance of a product that provides more reliable performance.”

The tubing in the kit features all the benefits of Wirsbo hePEX — flexible, durable, corrosion-resistant, 40-year history in radiant systems, 30-year limited warranty — with an oxygen diffusion barrier layer, which is recommended for closed-loop radiant heating and cooling systems. Wirsbo hePEX tubing is also tested in accordance with ASTM E119 and E84 standards, which meet or exceed the code requirements for fire-resistive ratings.

The kit also features the durability of Uponor ProPEX fittings, which require one simple tool without the need for torches, glues, solvents or gauges, and provide strong, durable connections that can withstand up to 1,000 pounds of pull force.

Additionally, for commercial plumbing applications, Uponor also offers the AquaPEX[®] Expansion Joint Kit (part number F8052000) to accommodate the expansion and contraction of PEX tubing in long plumbing piping runs.

Uponor Corporation is a leading supplier of plumbing, fire safety and radiant heating and cooling systems for the residential and commercial building markets across North America and Europe, and a market leader in municipal infrastructure pipe systems in the Nordic countries. Uponor Corporation employs 3,800 people in 27 countries and is listed on the NASDAQ OMX Helsinki Ltd., Finland.
