Uponor Launches Industry-first PEX to CPVC Adapter Fittings for Commercial Piping Systems

Uponor North America ([Uponor](#)) is launching an industry-first innovation with six new ProPEX® Lead-free (LF) Brass CPVC Adapter Fittings for transitioning from CPVC to PEX in commercial plumbing and hydronic distribution piping systems.

Uponor's new ProPEX® Lead-free (LF) Brass CPVC Adapter Fittings are available in 1¼", 1½" and 2" sizes for commercial plumbing and hydronic distribution piping systems.

The fittings, which are available in 1¼", 1½" and 2" sizes, are offered in a spigot and a socket adapter and all feature Uponor's durable, reliable ASTM F1960 ProPEX expansion system for connecting to PEX piping.

"These fittings offer designers and installers a fast and efficient solution for transitioning from CPVC to PEX in larger-diameter pipe sizes — something that the industry has not had available until now," says [Casey Swanson](#), sr. manager, Commercial Segment at Uponor.

The ProPEX end of the fitting is manufactured with lead-free brass and is tested and listed to NSF 61 and NSF 372 to meet lead-free requirements. The CPVC end of the fitting is designed to transition from copper tube size (CTS) pipe and fittings and is listed to the ASTM D2846 standard for CPVC fittings.

Uponor, Inc. is an award-winning provider of plumbing, fire safety, radiant heating/cooling and hydronic distribution piping systems for residential and commercial applications. In 2014, the company received the Community Impact Award for Sustainability and the Progress Minnesota award for driving business growth and economic development. The company was also named a Top 100 Workplace by the Minneapolis Star Tribune. Uponor, Inc. employs nearly 500 people at its North American headquarters in Apple Valley, Minn.
