Uponor Launches New ProPEX™ Brass Ball Valves for Radiant and Hydronic Piping Applications

Uponor North America (Uponor) is now offering a new, more cost-effective ball valve option for radiant heating/cooling and hydronic piping applications. These code-listed, commercial-grade, PEX-to-PEX, full-port ball valves are

available in ½" to 2" sizes and are appropriate for non-potable PEX piping applications.

The ½" to 2" valves are code-listed to allow engineers greater flexibility in design while the trusted, reliable ProPEX™ fitting connection provides contractors with greater peace of mind.

The valves are available on-demand in CAD and BIM design files via www.uponorengineering.com or www.arcat.com to make designing and specifying fast and easy. Additionally, they are listed to ANSI/NSF 14 and cNSFus-rfh and tested to ASTM F877, ASTM F1960, CSA B137.5 and NSF 359, allowing professionals the flexibility to add a reliable, code-listed valve anywhere in a commercial radiant heating/cooling or hydronic piping system.

“We are continuing to see growth in our indoor climate business, especially with hydronic piping applications,” says [Mark Hudoba](#), director, Heating and Cooling at Uponor. “Offering these cost-effective, code-listed valves provides professionals in the industry with a trusted, reliable product for hydronic piping as well as radiant heating and cooling applications.”

The valves feature stem extension kits to accommodate up to 2" of insulation in insulated piping applications.

The valves, which are compatible with systems containing up to 50 percent propylene glycol, feature blow-out-proof stems and are available with stem extension kits to accommodate up to 2" of insulation in insulated piping applications. Additionally, both ends of the valves are manufactured with Uponor's proven ProPEX™ fitting system for expansion connections that cannot be dry fit and hold tight with up to 1,000 pounds of radial force.

Uponor Ltd. is a leading supplier of plumbing, fire safety and radiant heating and cooling systems for the residential and commercial building markets in Canada. Uponor Ltd. employs 43 people across Canada and has its Canadian headquarters in Mississauga, Ont. For more information, visit www.uponorpro.com, www.uponor.ca or call 888.994.7726.
