## Uponor First PEX Manufacturer to Offer up to 2" Purple Pipe for Reclaimed Water Systems

To further meet the growing demand for sustainable building systems, Uponor North America ([Uponor](#)) is the first in the industry to offer a PEX purple pipe in sizes up to 2" for commercial and residential reclaimed water applications. In addition to its existing 1/2", 3/4" and 1" sizes, Uponor AquaPEX® Reclaimed Water pipe is now available in 1 1/4", 1 1/2" and 2" sizes as well.

**Uponor AquaPEX® Reclaimed Water pipe is the first PEX pipe available in sizes up to 2" for reclaimed water applications.**

"Uponor has a strong sustainability culture and looks to provide products that align with the company's philosophy of respecting the vital balance between people, planet and profit," says [Jayson Drake](#), director of Portfolio Management at Uponor. "Extending our current offering of Uponor AquaPEX Reclaimed Water pipe supports our mission of providing products

that help our business partners build sustainable structures around the world.”

The new offering comes in response to a growing need for water reuse systems in drought-stricken areas around the country. Offering a reclaimed water pipe in larger sizes gives professionals the opportunity to design and install even more reclaimed water applications to help conserve fresh-water resources.

Uponor’s extended offering, which is available in 300-ft. coils for ½", ¾" and 1" sizes and 10-ft. and 20-ft. straight lengths for 1", 1¼", 1½" and 2" sizes, provides all the benefits of Uponor AquaPEX that plumbing engineers and contractors have come to rely on — flexibility, durability, corrosion resistance, a 20-year proven history in plumbing, a 25-year limited warranty, and one simple ASTM F1960 ProPEX® expansion connection system that does not require any torches, glues, solvents or gauges.

“The best part about Uponor AquaPEX Reclaimed Water pipe is the fact that plumbing professionals don’t have to switch products when installing potable plumbing and reclaimed water systems,” says Drake. “They can seamlessly move from Uponor AquaPEX for the potable system to Uponor AquaPEX Reclaimed Water for the reclaimed water system without having to switch piping materials, tools or fittings.”

**Uponor, Inc.** is an award-winning provider of plumbing, fire safety, radiant heating/cooling, hydronic piping and pre-insulated piping systems for residential and commercial applications worldwide. In 2015, the company received the Governor’s Safety Award for workplace safety and health and also was named a Top 150 Workplace by the Minneapolis Star Tribune. Uponor, Inc. employs approximately 500 people at its North American headquarters in Apple Valley, Minn.
