# Uponor now offering ProPEX<sup>®</sup> connections for water service

**New fittings and valves offer a direct ProPEX<sup>®</sup> connection to residential and commercial multifamily water meters.**

Apple Valley, MN, Jan. 31, 2017 — Uponor North America ([Uponor](#)) is making it even easier to provide the reliability, high-performance and efficiency of an AquaPEX<sup>®</sup> plumbing system for homes and multifamily structures with the launch of its new ProPEX<sup>®</sup> connections for water service applications.

“With PEX installations in new-home construction surpassing copper and CPVC combined, we are continuing to provide even more solutions for designers and installers to incorporate the value of a complete Uponor AquaPEX plumbing system throughout a home or multifamily building,” says [Jayson Drake](#), director, Portfolio Management at Uponor.

**Uponor premiered the new ProPEX<sup>®</sup> lead-free (LF) brass water service straight and angle valves and mounting brackets at the 2017 International Builders' Show (IBS) in Orlando.**

Targeted for single-family homes and multifamily submetering, the new offering is available in engineered polymer (EP) straight or angle fittings, as well as lead-free (LF) brass straight or angle valves for connecting 3/4" and 1" Uponor AquaPEX pipe to 5/8", 3/4" and 1" water meters. Both fittings and valves feature NPSM swivel connections found on all water meters sized 5/8" to 1". The offering also includes mounting brackets to support the water meter system.

In addition to the valves, the offering also includes ProPEX engineered polymer (EP) straight and angle fittings.
